SI. RDF units

SII. Overview of the systems

1 This Supporting Information document holds circular statistics and histograms of activity along time in Section ??, the fraction of vertices in the peripheral, intermediary and hub sectors in Section ?? and the combination of basic topological measures into principal components with greater variance in Section ??. There is a focus on email list interaction networks for benchmarking and Section ?? reinforces the results with the analysis of networks from Facebook, Twitter and Participabr. More context (e.g. methods, discussion, data and scripts) is given in the main document? to which this current document supplies supporting information.
